Programme Objectives

The successful candidate completing the Diploma in Emergency Medicine will attain the knowledge and skills needed to work as a Staff Registrar in the emergency department (ED).

Training will focus on knowledge needed to manage the wide variety of clinical problems commonly encountered in the ED, sound clinical reasoning and decision making, procedural skills integral to ED work, patient safety awareness, communication skills, and ethical issues unique to emergency medicine. Training in basic ability to access, review and apply pertinent medical and scientific literature to daily practice will also be incorporated.

Programme Director

Dr Sohil Pothiawala
Consultant, Department of Emergency Medicine
Singapore General Hospital (SGH)

**Admission Criteria**

This programme is open to all medically-trained doctors who possess Temporary registration (Service), Conditional registration or Full registration with the Singapore Medical Council (SMC). However, applicants must also satisfy the following criteria for admission into this programme:

- Currently working in an Emergency Medicine department and have at least ONE year of local clinical work experience in an emergency medicine department in the same local restructured hospital in Singapore;
- Have a sponsoring unit, department or institution and identified by Head of Department strictly based on merit and received good work reviews.

**Programme Duration**

This is a 2 year Diploma course comprising of 4 semesters (6 months duration each). Curriculum will be structured and carried out by recognised specialists in the field of Emergency Medicine. Trainees will attend classroom and practicum sessions over the four semesters. Classes are organised into blocks of half and full day lessons over the semesters.

**Training Structure**

Training will be in the form of apprenticeship, lectures, tutorials, practical sessions, and case studies. Trainees will be required to maintain procedure log book, patient logbook, and reading log book which will record patient cases, procedures, conferences, seminars and paper presentations, and submit to the supervisors for inspection every month.

**Yearly Commencement date:**
April/May

**Yearly Application period:** From December – January

**Programme Curriculum**

1. Basic and advanced resuscitation knowledge and skills
2. Approach to common symptoms presenting to the ED.
3. Management of medical, toxicology, surgical and injury related emergencies
4. Management of symptoms and diseases in children, pregnant women and elderly people
5. Practical and procedural skills including resuscitation skills, manipulation and reduction of fractures and dislocations, splintage and immobilization, analgesia and sedation, eye and ear examination etc.
6. Communication skills, patient safety awareness, risk management and basic shop floor management
7. Principles of pre-hospital emergency medicine and management of mass casualty events

**Assessment Criteria**

For the duration of the course, trainees will be required to sit for online assessments, undergo practical assessments of clinical examination skills, submit written case report and literature review. The final assessment comprises written final assessments and clinical examination tests. All online and written assessments, and written reports together with the final assessments will contribute to the final grade for the course. The supervisors shall review the trainees' performance every month.
