

National Residents Shoulder Arthroscopy Workshop 2017

Programme

ASTC, National University Hospital, Singapore
25th November, 2017

Course Description

The learning objective for this course is to understand the range of treatment solutions available for soft tissue injuries of the shoulder and also gain practical hands-on experience of these procedures during expert-lead cadaveric lab sessions. This wet lab course will consist of short lectures, discussions and a large amount of hands-on practical time with the focus on arthroscopic shoulder procedures. There will be ample opportunity to practice repair techniques as well as the chance to discuss new technologies and treatment options with a highly experienced Faculty.

Participant Profile

This course is aimed at surgeons who are in their 3rd or 4th year Orthopaedic Residency.
